

# Partners Hosted Voice Solutions for Business

Your business deserves the latest phone and collaboration features, so your team can easily work from anywhere on any device, with the right Partner to support you with, no contract.

Partners Hosted is a cloud-based unified communication (UCaaS) and collaboration platform for businesses of all sizes.

At Partners Technology, our platform is backed by a team of experts that provide local service and support. We handle all aspects of the project from design, installation, training, to on-going maintenance of your cloud phone solution, all for an affordable monthly fee, with no hidden charges.

## Why Partners Hosted?

- **Partners Hosted is future-proof:** As soon as we introduce new features, we roll them out to our customers, so you will not have to worry about ongoing support, or another large capital equipment upgrade a few years down the road. You will be able to implement new functionality at the click of a button.
- **Elimination of Equipment:** No on-site PBX, no maintenance, no software assurance, no costly upgrades.
- **Scalability and Agility:** With Hosted VoIP, there is no penalty to start small and then add “seats” to the system as you grow, as you only pay for the seats you need on a subscription basis.
- **Seamless Remote/Mobile Connectivity:** Remote workers easily connect from their device of the choice, physical phone, desktop or mobile.

- **Reduce Trunk Lines:** Renting trunk lines from carriers is not small change for most organizations that rely on voice for both internal communications and customer interaction. Trunk line rental is a significant part of monthly overhead cost. Each phone includes a DID line with unlimited local and long distance (US, Canada) in your monthly fee with predictable monthly billing.
- **Eliminate Move, Addition and Change Costs:** Every time your company moves, adds, or changes a conventional telephone connection, it costs money. With Partners Hosted, your changes are included in your monthly fee.
- **Full on-site provisioning and training**
- **Emergency Service & Support:** Support calls are answered LIVE 24/7 and emergency service requests are responded to within 2-hours on-site, if required.

Bringing People and Technology Together

781.930.5000 | 471 Page Street, Unit 6 | Stoughton, MA 02072 | [www.partnerstechnology.com](http://www.partnerstechnology.com)

From desk phones to softphones, and mobile apps, Partners Hosted has your voice, and collaboration needs covered.

Enhance employee and customer experience with better mobility, collaboration, security, and business continuity.

## Key Benefits of Partners Hosted:

### Seamless Communication

Manage voice, email and messaging from a single screen to reduce complexity and boost productivity. Experience seamless communication on any device, and collaboration anywhere in the world.

### Scalability

Expand as your business grows and customize your communications to stay ahead of the competition. Moves, Add's and Changes are simple and easy to add or remove seasonal or part-time workers.

### Customer Experience

Deliver the best customer experience with available Contact Center features, and CRM integration to sync customer data in real time to provide superior customer service.

### Reliable & Secure

Choose from Public or Private Cloud, with no servers to install, and no software to maintain. Partners Hosted delivers high reliability, exceptional quality and enterprise-class security.
